MISSION

My mission is to create exciting web applications delivering world-class quality in design through experience.

EDUCATION

Lawrence Technological University – Graduation Spring 2013

Bachelors of **Computer Science** with a concentration in business applications.
Minoring in **Business Management**.

WORK EXPERIENCE

June 2012 to present – **Mango Languages**.

Web Developer

Mango Languages specializes in language learning software for consumers and libraries. Mango Languages contacted me to create a **Google Hangout** application called Mango Skits; a multiplayer game to be presented at **Google IO**.

- Deployed from initial concept to production **1 month before deadline**.
- Built on **Heroku** and **Twitter Bootstrap** using **Ruby on Rails 3.2**.
- Collaborated with **Google** to harness their immature API.

January 2012 to June 2012 – **Ideomed Inc.**

Contractual Web Development

Ideomed hired me to expand their **Ruby on Rails** platform. Ideomed's app, Abriiz, helps parents track their child's asthma.

- Deployed using **Heroku** and **Ruby on Rails 3.1** for rapid development.
- Developed using **Agile methods** such as **pair programming** and **Test Driven Development**.
- Relieved front end **technical debt in just 2 months**.

June 2011 to October 2011 – **SpeedySeat Inc.**

Contractual Web Development

SpeedySeat.us recruited me to develop a front house restaurant reservation and seating software. Using Amazon's **cloud computing platform**, SpeedySeat was developed for rapid deployment, load balanced reliability and efficient use of resources.

- Deployed to **EC2** via **Chef** with an **S3** storage system for a **shared-nothing-architecture**.
- Designed using **Jade/Compass/SCSS + jQueryMobile**.
- Page layouts automatically adjust for mobile optimization via **CSS Media Queries**.
